workstations
relocated and
reconfigured

Saved 22%

over competition

The Challenge

The market leader for authentic, officially licensed sports merchandise was looking for a furniture solution for a newly designed office space to address their rapid growth. In addition to new furniture, they wanted to maximize the value of the assets they currently owned. This project had an accelerated time frame and a tight budget.

Project Goal: Maximize the assets the client currently owned and provide a value-oriented new furniture solution on an aggressive time frame and competitive budget. The new furniture solution had to work seamlessly with their existing furniture.

The Solution

Suddath® provided a comprehensive space and furniture plan and found ways to reconfigure and reuse existing workstations which significantly helped to keep the budget manageable. By getting involved early in the process, we had the ability to utilize their existing workstations in a new configuration that was more efficient and reduced waste. We supplemented their existing furniture with a value-oriented new furniture solution. Our experience in space and furniture planning, and our relationship with our furniture manufacturers, gave us the ability to give our client the look and feel they wanted while keeping their costs down.

Client Testimonial

"Suddath Office Furniture's unique ability to provide a quality, value-oriented furniture solution was a game changer. Suddath was able to assess our existing furniture assets and integrate them with our new project. It has been a pleasure working with a team that understands and meets our workplace needs."
